Description

- **Application:** For plastic greenhouses with double film covering
- **Function:** Reliably fills the double film with air for optimal insulation
- **Performance:** 190 m³/h for fast inflation
- **Feature:** Low maintenance and optimized for greenhouse climate conditions

Inflation fan 190 m³/h with mounting plate is specifically designed for use in plastic greenhouses with double film coverings. It ensures reliable inflation of the air cavity between the films, providing optimal thermal insulation for the greenhouse interior.

Thanks to its robust construction, the fan is highly resistant to greenhouse climate conditions and requires minimal maintenance. The airflow capacity of 190 m³/h enables quick inflation, ensuring efficient insulation performance in a short time.

This fan is an ideal solution for greenhouse operators seeking a durable and efficient method for insulating their structures using double-layer film technology.
