Description

- **Application area:** Fastening wires to square pipes in shading systems
- **Material:** Galvanized steel for high corrosion resistance
- **Installation:** Secured by screwing onto the square pipe
- **Special feature:** No additional drill holes required

The **Wire holder 50.50** is a reliable solution for securely fastening wires to square pipes in shading systems. Its robust galvanized steel construction offers high corrosion resistance, making it ideal for long-term use in greenhouses.

Installation is carried out by simply screwing the holder onto the square pipe, eliminating the need for additional drill holes. This simplifies setup and ensures stable fixation that withstands high tension.

Even after the wire is in place, the holder can be easily repositioned, allowing flexible adjustment to various requirements.
