Description

- **Application area:** Tensioning device for retroactive adjustment of already installed wires and cables
- **Material:** Galvanized steel for high corrosion resistance
- **Special feature:** Removable tension drum for easy re-tensioning

The **Wire tensioner for retroactive tightening** is a practical solution for adjusting already installed wires and cables without the need for time-consuming disassembly and reinstallation. Thanks to its removable tension drum, the tension can be easily and efficiently adjusted.

The robust galvanized steel construction ensures high corrosion resistance and long service life, even under demanding conditions.
