Description

- **Application:** Complete system for inflating double-layer film in greenhouse structures
- **Components:**
  - 1x Inflation fan with mounting plate
  - 1x Jumper hose Ø63 mm, length 6 m
  - 1x Air transfer gasket with back-flow flap
  - 2x Plastic hose clamps Ø60–65 mm
- **Function:** Ensures reliable air inflation for optimal insulation
- **Feature:** Low maintenance and optimized for greenhouse climate conditions

Inflation system set for double-layer films is a convenient all-in-one solution for inflating double-layer greenhouse films. The system maintains consistent internal air pressure, providing effective insulation and improving the greenhouse's energy efficiency.

With all necessary components included, such as a powerful inflation fan, flexible hose, and an air transfer fitting with an integrated back-flow flap, the set is easy to install and designed for long-term, low-maintenance operation.

Thanks to its durable materials and well-engineered construction, this system is an ideal choice for growers seeking a reliable and efficient solution for insulating greenhouse structures.
