

Overview

Insect protection screen - no thrips 0,163 x 0,163 mm weight: 132 g/m

Product number: 05323220

Description

Our woven insect screen with a mesh size of 0.163 x 0.163 mm and a length of 200 cm protects your greenhouse from insects and other small pests. Thrips in particular are kept away thanks to the particularly narrow mesh size. The fabric is easy to cut and can be assembled very quickly. We recommend our heat cutter (Article #) for cutting to prevent the fabric from fraying.
