Description

This grooved cable drum ensures friction free, well-ordered winding and therefore a smooth movement of driving cable in shading systems .

Two-halves model of the drum makes it possible to fasten it onto drive shaft subsequently. The two halves are connected quick and easy with U-bolt. To install the drum onto the drive shaft a headless screw is needed.

The cable drum is made of high-impact resistant plastic, that is friendly to cables and therefore increases their durability.

Can be used with cords with a diameter up to 3 mm
For 34 mm drive shafts
Capacity of cable drum: up to 5,70 m

Material:
Cable drum: High impact resistant plastic
U-Bolt: Galvanized steel

All prices excl. VAT plus shipping costs and possible delivery charges, if not stated otherwise.
