Description

- **Application area:** Tensioning device for wire ropes in roll screen systems, especially for tight installation spaces
- **Material:** High-quality steel, Sendzimir galvanized for optimal corrosion protection
- **Installation:** Secured exclusively with M6 screws for safe and stable fixation
- **Special feature:** Compact design allows space-saving installation
- **Advantages:**
  - Enhanced wire tension stability
  - Durable construction thanks to galvanized steel
  - Ideal for roll screen systems in greenhouses
  - Prevents unwanted slack in the wire

The **Compact wire tensioner for roll screen** is specifically designed for tight installation spaces in shading systems. Its compact design enables stable wire tension and ensures reliable fastening. Made from Sendzimir galvanized steel, the component offers optimal corrosion protection.

Installation is carried out exclusively with M6 screws, ensuring particularly secure fixation. This makes the tensioner ideal for use in greenhouses where precise and long-lasting wire tension is required. The construction prevents unwanted slack and maintains consistent tension over extended periods.

Users also benefit from increased overall wire guidance stability, making the tensioner an indispensable element in professional roll screen systems.
