Description

- **Application area:** Guiding irrigation hoses in garden and greenhouse installations
- **Material:** Galvanized metal spike with plastic guide for high stability
- **Total length:** 57 cm
- **Metal spike length:** 31 cm
- **Plastic guide length:** approx. 18 cm

The **Hose guide roller Type 3 with steel disc on top / plastic disc on bottom** enables precise guidance of irrigation hoses around corners and obstacles. This protects both the hose and surrounding areas such as garden beds or building edges from damage.

Thanks to the long metal spike and sturdy plastic guide, the hose roller remains securely anchored even under strong pulling forces. It is especially suitable for firm soils and demanding garden or greenhouse environments.
