Description

- **Application:** Custom fabric strips for side skirts, motor strips, and other greenhouse applications
- **Standard cutting:** Fabric strips are cut to customer specifications
- **Hem finishing:** All strips are hemmed around the edges
- **Versatile use:** Suitable for various systems and structural requirements

The **fabric strip assembly** is a standardized service for producing individually cut strips from greenhouse fabric. These strips are used in a variety of applications, such as side skirts or motor strips in roll screen systems and other climate control solutions.

All strips are hemmed around the edges to ensure clean finishing and high durability. Optionally, cords can be sewn into the hem to facilitate installation.

The assembly is carried out precisely according to customer specifications and can be flexibly adapted to different structural conditions – ideal for professional horticultural use.
