Description

- **Application:** Suitable for shading systems with suspended fabric and gable drive configuration
- **Material:** Impact-resistant plastic for high stability
- **Function:** Ensures accurate positioning of the drive shaft
- **Packaging Unit:** 25 pcs

Offset bearing for 50/50 mm square tube is specifically designed for use in greenhouse shading systems featuring suspended fabric and a gable-driven layout. It accurately positions the drive shaft and supports smooth rotational movement during operation.

Made from durable, impact-resistant plastic, this component provides high load-bearing capacity and long-term performance, even under challenging greenhouse conditions.

Installation requires an M8 x 70 bolt and one M8 Nyloc nut (not included).
