Description

- **Application:** Closed sun shading and energy-saving screen for greenhouse applications
- **Material:** Woven aluminum, HDPE and acrylic yarns
- **Width:** 530 cm
- **Energy saving:** approx. 58%
- **Shading:** approx. 55%
- **Light transmission:** approx. 45%
- **Features:** Woven screen fabric for lay-on systems

The **PH 55** is a woven sun shading and energy-saving screen for greenhouse applications. The combination of approx. 55% shading, approx. 58% energy saving and approx. 45% direct light transmission provides an effective balance between climate control and light transmission.

Made from woven aluminum, HDPE and acrylic yarns, the fabric has a weight of approx. 73 g/m². In the 530 cm width, the material is designed for lay-on systems.

The product is intended for indoor greenhouse use and is supplied with an 8-year manufacturer's warranty. Several fire-related standards are also listed in the technical data sheet.

Note: The price refers exclusively to the material costs; additional costs may apply for confectioning or made-to-measure finishing.

Product information

Energy Saving:	58 %
Shading:	55 %
Direct Light transmission:	45 %
Flame retardant (DIN 4102 B1):	No
UV Stabilization:	600 kLy
Weight (+/- 10%):	73 g/m ²
