

## Overview

# PH 66 B FP

Product number: 19166343

### Options

#### Width (cm):

## Description

- **Application:** Closed shading and energy-saving fabric for greenhouse applications
- **Material:** Woven aluminum, HDPE and acrylic yarns
- **Width:** 530 cm
- **Energy saving:** approx. 63%
- **Shading:** approx. 65%
- **Light transmission:** approx. 35%
- **Features:** Woven shading fabric for lay-on systems

The **PH 66** is a woven shading and energy-saving fabric for greenhouse applications. The combination of approx. 65% shading, approx. 63% energy saving and approx. 35% direct light transmission provides a balanced relationship between climate control and light permeability.

Made from woven aluminum, HDPE and acrylic yarns, the fabric has a weight of approx. 73 g/m<sup>2</sup>. In the 530 cm width, the material is designed for lay-on systems.

The product is intended for indoor use and is supplied with an 8-year manufacturer's warranty under all types of greenhouse coverings. The technical data sheet also lists several fire-related standards.

**Note:** The price refers exclusively to the material costs; additional costs may apply for confectioning.

## Product information

<b>Energy Saving:</b>	60 %
<b>Shading:</b>	53 %
<b>Direct Light transmission:</b>	47 %
<b>Flame retardant (DIN 4102 B1):</b>	No
<b>UV Stabilization:</b>	600 kLy
<b>Weight (+/- 10%):</b>	94 g/m <sup>2</sup>
