Description

- **Application:** Shading systems for greenhouses
- **Material:** White, transparent-diffuse fabric
- **Width:** 430 cm
- **Shading Rate:** Approx. 65%
- **Light Transmission:** Approx. 35%
- **Energy Savings:** Approx. 47%
- **UV Stability:** 600 kLy

Clima+ 65 – 430 cm is a premium shading fabric tailored for indoor use in greenhouses. It strikes a balance between light transmission and effective shading to support optimal growing conditions.

The UV-stabilized construction ensures longevity under high exposure, while its white, diffuse texture distributes incoming light evenly across plant surfaces. Its open structure also promotes stable airflow, making it a valuable component in advanced greenhouse climate control systems.

Note: Pricing refers to raw material only. Additional charges may apply for finishing (e.g. cutting, hemming).

Product information

Energy Saving:	47 %
Shading:	65 %
Direct Light transmission:	35 %
Flame retardant (DIN 4102 B1):	No
UV Stabilization:	600 kLy
Weight (+/- 10%):	93 g/m²
