Description

- **Application:** Side ventilation systems in greenhouses
- **Function:** Connecting element between a manual drive or worm gear drive and a 1" drive shaft
- **Features:**
  - Suitable for manually operated ventilation systems without electric drives
  - Ensures reliable torque transmission between the drive unit and drive shaft
  - Robust construction for long-term use in greenhouse applications
  - Easy integration into new and existing ventilation systems

The **1" manual drive adapter** is designed as a connecting element between a manual drive or worm gear drive and a 1" drive shaft. It is commonly used in greenhouse side ventilation systems and ensures reliable transmission of operating forces to the ventilation mechanism.

Its robust construction makes it suitable for long-term use under demanding greenhouse conditions. The adapter can be installed quickly and easily, making it an ideal solution for both new installations and retrofit applications.
