

Overview

Inflation Blower 190 m

Product number: 21100498

Description

The inflation fan is used for double film greenhouses. It inflates double film so that optimal insulation is ensured within the greenhouse.

The fan is specially designed for greenhouses and can perfectly cope with any climate conditions inside greenhouse. It is therefore very low-maintenance and, if operated properly, free of malfunctions and failures.

The output of 190 m³ / h ensures fast filling of the double film.
