Description

- **Product:** Lexan film fastener Type 2
- **Packaging unit:** 100 pieces
- **Application area:** Fastening bubble wrap to greenhouse walls
- **Function:** Securing the film to glass or twin-wall sheets
- **Special feature:** Barbs for secure hold during installation
- **Advantages:** Wind- and weather-resistant, easy to use

The **Lexan film fastener Type 2** is a reliable solution for securely fastening bubble wrap to greenhouse walls. It provides additional insulation and helps regulate the temperature inside the greenhouse efficiently.

The fasteners consist of two parts: the base is fixed in place using silicone adhesive (Contractors), then the bubble wrap is pressed onto the base and firmly sealed with the upper part. Thanks to its locking mechanism, the fastener is particularly wind- and weather-resistant. The integrated barb ensures that the film stays securely in place during installation and does not slip.

After frost periods, the upper parts can be easily unscrewed and reused if needed. With a packaging unit of **100 pieces**, the fasteners are ideal for professional use. A reliable and long-lasting solution for gardeners and farmers who want to insulate their greenhouses effectively.
