Description

AquaFloora optimizes the irrigation on your potting tables. Due to the seamless combination of highly capillary AquaFil-Mat and GroundCover you will benefit from:

- Extremely simple handling - both textile surfaces are permanently laminated and do not slip apart.
- A very smooth surface, which is easily and quickly cleaned – wiping or sweeping is completed in no time
- A wrinkle-free surface, which reduces puddles and associated evaporation

Our irrigation mat consists of:

Created at 18.05.2024.

* Our offers are directed exclusively to companies. We do not conclude contracts with consumers. All prices excl. VAT plus shipping costs and possible delivery charges, if not stated otherwise.

Layer 1 (Surface): a lightproof and water permeable woven textile/ground cover for an easy handling and cleaning and also to protect the application from algae.

Layer 2: a non-woven light-weight but extremely absorbent capillary mat for a high water retention and even distribution

Layer 3 (bottom): a PE-sheet for the best economy of water possible and therefore minimal water waste and most effective water usage. Depending on your water-holding capacity needs you can choose between two types of non-wovens:

- 200 g-Fabric - water-holding capacity of approx. 1 Liter - with AquaFil 120
