Description

• Product: Aquafloora 120 - 3 layers

• Structure: Three-layer • Surface weight: 300 g/m²

• Width: 160 cm • **Length:** 50 m

• Application: Irrigation systems for cultivation tables

• Material: Aquatex Groundcover 100 + Aquafil 120 + PE film • Function: Optimized water retention and even distribution

• Advantages: High water absorption, easy cleaning, crease-free surface

Aquafloora 120 is an innovative solution for irrigating cultivation tables. Its three-layer structure combines high-capillarity AquaFil irrigation fleece with Groundcover and a PE film to ensure optimal water retention and uniform distribution.

The crease-free surface prevents puddle formation, reducing evaporation. In addition, the surface is especially easy to clean—sweeping or wiping is all it takes.

With a water storage capacity of approx. 1 liter/m², Aquafloora 120 – 3 layers ensures efficient water usage and supports healthy plant growth. The combination of high-quality materials makes it a durable and reliable solution for professional growers.
