450

Description

A Shading fabric consisting of acrylic and aluminium fibers. The woven aluminium reflects the sunrays preventing them to penetrate into greenhouse and thus decreasing the temperature inside.

The acrylic fibers absorb moisture in the greenhouse ensuring a drier, fungus-free and healthier greenhouse climate.

The fabric can be suspended without further assembly S-hooks.

Created at 20.05.2024.

* Our offers are directed exclusively to companies. We do not conclude contracts with consumers. All prices excl. VAT plus shipping costs and possible delivery charges, if not stated otherwise.
