Description

- **Application area:** Construction of cable systems for various applications, especially in greenhouse and livestock installations
- **Material:** Corrosion-resistant design with plain bearing
- **Rope diameter:** Suitable for wires and ropes up to Ø 7 mm
- **Load capacity:** Maximum load of 100 kg

The **Pulley 90 mm - plain-bearing** is ideal for constructing cable systems across a range of applications. It is particularly well-suited for use in greenhouses and livestock facilities.

Thanks to its plain-bearing design, the pulley is corrosion-resistant and ensures reliable guidance of wires and ropes up to 7 mm in diameter. With a maximum load capacity of 100 kg, it is also suitable for demanding applications.
