## **Description**

- Application: Budget-friendly closed knitted fabric for greenhouse shade screens
- Material: Transparent synthetic yarns with acrylic content
- Width: 430 cm
- Feature: Aims to stabilize humidity while ensuring thermal savings

EcoScreen ES10 - 430 cm brings shading performance and climate balance into a wider format. Used as a daytime screen, it helps limit energy losses by blocking thermal escape during colder periods—without compromising on light diffusion or ambient stability.

Its design is well-suited for overlay and suspended configurations, particularly in professional greenhouse environments where wide-span coverage is required on a budget.

**Note:** Price refers to the material only. Processing services may be billed separately.
