• Feature: Fast, screwless installation - non-detachable connection

• Packaging Unit: 300 pcs

Lead edge connector 19 L offers a reliable and time-saving method for **joining 19 mm aluminum and steel tubes** in static greenhouse structures. The clip-on design locks securely when pressed with pliers, eliminating the need for additional fasteners while maintaining a firm hold.

Made of premium plastic, it provides long-term durability with minimal weight—perfect for fixed assemblies and structural frames in shading or greenhouse systems.
