530

## **Description**

Transparent energy saving fabric with a shading value of appr. 15% and an energy saving of appr. 45%. It is particularly suitable for greenhouses with a high energy consumption.

The fabric is used in a greenhouse as a transparent screen to reduce heating costs. For this, it remains closed at low outdoor temperatures.

Due to woven acrylic yarns, a good moisture exchange is ensured.

The fabric meets the B1 heavy-flammability guidelines for the European market.

For suspended system reinforcement ribbon with hook installation is possible.
