Description

- **Application:** Air circulation in greenhouses for temperature and humidity regulation
- **Features:**
  - Even temperature distribution throughout the greenhouse
  - Serrated fan blades for efficient airflow
  - Reduced condensation and dripping – lowers risk of plant diseases
  - Long throw distance with low energy consumption
  - Extremely quiet operation
  - Special air intake ring for optimized airflow guidance
  - Lightweight design with low overall weight
  - Dual-sided finger guard for enhanced safety
  - Speed control compatible with EPU-12

Fan CAF-45 50 Hz is specifically designed for greenhouse applications, providing even air distribution at low energy consumption. Its innovative design, featuring serrated blades and a dedicated intake ring, ensures optimal airflow while minimizing humidity and reducing the risk of fungal diseases.

The fan operates with minimal noise and has a lightweight construction, making it ideal for continuous use in professional horticultural environments.
