Overview

Fan CAF-45 50 Hz

Product number: 21100496

Description

- · Application: Air circulation in greenhouses for temperature and humidity regulation
- Features:
 - Even temperature distribution throughout the greenhouse
 - Serrated fan blades for efficient airflow
 - o Reduced condensation and dripping lowers risk of plant diseases
 - Long throw distance with low energy consumption
 - o Extremely quiet operation
 - o Special air intake ring for optimized airflow guidance
 - Lightweight design with low overall weight
 - Dual-sided finger guard for enhanced safety
 - Speed control compatible with EPU-12

Fan CAF-45 50 Hz is specifically designed for greenhouse applications, providing even air distribution at low energy consumption. Its innovative design, featuring serrated blades and a dedicated intake ring, ensures optimal
