

Overview

Fan CAF-45 50 Hz

Product number: 21100496

Description

- **Application:** Air circulation in greenhouses for temperature and humidity regulation

- **Features:**

- Even temperature distribution throughout the greenhouse
- Serrated fan blades for efficient airflow
- Reduced condensation and dripping – lowers risk of plant diseases
- Long throw distance with low energy consumption
- Extremely quiet operation
- Special air intake ring for optimized airflow guidance
- Lightweight design with low overall weight
- Dual-sided finger guard for enhanced safety
- Speed control compatible with EPU-12

Fan CAF-45 50 Hz is specifically designed for greenhouse applications, providing even air distribution at low energy consumption. Its innovative design, featuring serrated blades and a dedicated intake ring, ensures optimal airflow while minimizing humidity and reducing the risk of fungal diseases.

The fan operates with minimal noise and has a lightweight construction, making it ideal for continuous use in professional horticultural environments.
