

## Overview

# Telescopic Shaft 1240-1960mm

**Product number:** 33100000

## Description

For automatically or manually operated drive systems to open and close side ventilation. The telescopic shaft is particularly suitable for operating in lightweight greenhouses such as poly greenhouses. Its stable aluminium housing in combination with the stainless steel piston rod ensures a maintenance-free and stable operation. It provides an extremely simple assembly owing to the reliable coupling with two flats. The Trans Axle Unit fits permanently mounted motors. Maximum driving range is of 34 °.
