

## **Overview**

## Screen stop finger

Product number: 98200100

## **Description**

- Application area: Horizontal shading systems
- Function: Prevents fabric from entering adjacent truss sections during closing
- Material: Stainless steel (Inox) corrosion-resistant and durable
- Installation: Used in combination with the Inox truss clip
- Packaging unit: 500 pieces
- Special features:
  - o Protects the fabric from mechanical stress
  - o Enables precise guidance of the shading material
  - $\circ\,$  Ideal for professional greenhouse installations with horizontal shading systems

The **Inox fabric guide** is a specially developed component for shading systems. In combination with the Inox truss clip, it ensures that the fabric does not enter adjacent truss sections during closing. Made of corrosion-resistant stainless steel, it offers a long-lasting and reliable solution for professional greenhouse installations.
