

Overview

Screen stop finger

Product number: 98200100

Options

PU (Pcs)

Description

- **Application area:** Horizontal shading systems
- **Function:** Prevents fabric from entering adjacent truss sections during closing
- **Material:** Stainless steel (Inox) – corrosion-resistant and durable
- **Installation:** Used in combination with the Inox truss clip
- **Packaging unit:** 500 pieces
- **Special features:**
 - Protects the fabric from mechanical stress
 - Enables precise guidance of the shading material
 - Ideal for professional greenhouse installations with horizontal shading systems

The **Inox fabric guide** is a specially developed component for shading systems. In combination with the Inox truss clip, it ensures that the fabric does not enter adjacent truss sections during closing. Made of corrosion-resistant stainless steel, it offers a long-lasting and reliable solution for professional greenhouse installations.
