Description

- **Application:** Transparent energy screen fabric for heat-intensive greenhouses
- **Material:** Woven acrylic yarns for reliable moisture transfer
- **Width:** 480 cm
- **Energy saving value:** approx. 47%
- **Shading value:** approx. 60%
- **Light transmission:** approx. 40%
- **UV stabilization:** 600 kLy
- **Weight:** 81 g/m² (+/- 10%)

PhormiTex Lumina 60 O is a transparent energy screen fabric specially developed for heat-intensive greenhouses. It is used as a day screen and helps reduce heating costs by remaining closed when outside temperatures are low.

The woven acrylic yarns ensure reliable moisture transfer, while the higher shading value provides stronger reduction of solar radiation.

Note: The price refers to material costs only; additional costs may apply for confectioning.

Product information

Energy Saving:	47 %
Shading:	60 %
Direct Light transmission:	40 %
Flame retardant (DIN 4102 B1):	No
UV Stabilization:	600 kLy
Weight (+/- 10%):	81 g/m ²
