

Overview

Motor Control Unit RMC400\400\3\0,4-0,6 A

Product number: 35053222

Description

- **Application:** Intelligent control unit for Ridder gear motors with end switch system
- **Voltage:** 3-phase, 400 V (208–600 V supported)
- **Current:** 0.4–0.6 A
- **Protection:** Fully potted PCB, moisture- and vibration-resistant
- **Features:** Phase monitoring, thermal protection, reverse delay, LED diagnostics
- **Control:** External 24 V signal (AC/DC) or optional manual switch
- **Compatibility:** Supports Ridder PositioningUnit (RPU)
- **Ridder Article No.:** 584660

The **RMC400 control unit** is a smart and rugged controller for Ridder gear motors. It offers advanced protection features, automatic phase correction, and compatibility with RPU systems. Ideal for demanding greenhouse automation environments.
