

## Overview

# Universal cloth clip 6 mm - PU = 500 pcs

**Product number:** 67100060

## Description

Our spring clips are used to fasten a film or fleece to poly tunnel stakes and in this way to build a light tunnel as a cover from frost or bad weather.

The ventilation of simple tunnels made of spring steel rods is supported by the spring clips. Beat the foil side up and attach the turned-up film with clips on the spring steel bars.
