Description

- **Application:** Greenhouse shading system
- **Material:** Acrylic and aluminum fibers
- **Shading Rate:** Approx.55%
- **Width:** 350 cm
- **Color:** Alu-White
- **Feature:** Moisture-regulating and reflective

FFS 2/4 alu-white is a high-performance shading fabric designed specifically for greenhouse use. Integrated aluminum fibers reflect solar radiation before it penetrates the greenhouse, effectively lowering interior temperatures.

The acrylic component absorbs evaporative moisture, creating a drier and healthier indoor climate that helps prevent fungal growth. This fabric can be installed using S-hooks without additional finishing and is available in various widths and colors.

Its thoughtful fiber blend delivers an optimal balance between light permeability and thermal control, ensuring crops are protected from excessive heat exposure.

Note: Price refers to material only. Additional fees may apply for processing (e.g. cutting, sewing).

Product information

Energy Saving:	60 %
Shading:	55 %
Direct Light transmission:	45 %
Flame retardant (DIN 4102 B1):	No
UV Stabilization:	5 years (climate: Central Europe)
Weight (+/- 10%):	115 g/m ²
