## Description

- **Application:** Open shading fabric for optimal air circulation in greenhouses
- **Material:** Interwoven acrylic yarns for reliable moisture exchange
- **Width:** 430 cm

**PH 77 open FP** is a durable, open-structured shading fabric with an approximate shading level of 75% and energy savings around 30%. Its open weave enables optimal airflow within the greenhouse, even when shading panels are closed without ventilation gaps.

The interwoven acrylic yarns ensure effective humidity regulation and help maintain a stable greenhouse climate. The fabric is particularly suitable for laid screen installations where consistent ventilation is crucial.

**Note:** Price refers to material only. Additional costs for fabrication (e.g. cutting, sewing) may apply.
