Description

Application: Open shading fabric for regulating light and temperature in greenhouses

Material: Woven white ribbons for reliable moisture and air exchange

Width: 525 cm

Energy saving value: approx. 25%

Shading value: approx. 60%

Light transmission: approx. 40%

UV stabilization: 600 kLy

Weight: 77 g/m² (+/- 10%)

PhormiTex Lumina 60 O is an open shading fabric with white ribbons, designed to regulate light and temperature in greenhouses. Its open structure enables continuous air exchange and prevents excessive heat buildup inside the greenhouse.

The woven ribbons ensure reliable moisture exchange and support a stable, balanced microclimate – ideal for crops that require good air circulation.

Note: The price refers to material costs only; additional costs for confectioning may apply.

Product information

Energy Saving:	25 %
Shading:	60 %
Direct Light transmission:	40 %
Flame retardant (DIN 4102 B1):	No
UV Stabilization:	600 kLy
Weight (+/- 10%):	77 g/m ²
