Overview

Grommet 4.8 - PU = 1000pcs

Product number: 22000130

Options

PU (Pcs)

1

1000

Description

- Application: Protecting polyester wires routed through holes in metal profiles
- Material: Plastic
- Installation: Snap-fit locking in sheet metal via integrated detent
- Max. Profile Thickness: 4 mm Packaging Unit: 1000 pcs

Wire Guide 4.8 is a plastic insert designed to protect polyester wires that pass through openings in metal profile sections. Its integrated detent mechanism ensures secure anchoring within the sheet, preventing movement and abrasion.

Compatible with profiles up to 4 mm thick, this wire guide offers an effective and durable solution to reduce wear and extend the service life of cable systems in greenhouse structures and technical installations.
