Description

- **Application area:** Static connection for 19 mm aluminum and steel pipes
- **Material:** High-quality plastic for a lightweight yet stable connection
- **Installation:** Simple plug-in assembly, fixed by pressing with pliers
- **Special feature:** Quick installation without screws, non-detachable

The **Lead edge connector 19 L** is a practical solution for static connection of 19 mm aluminum and steel pipes. It enables fast and secure assembly through a simple plug-in system that is fixed by pressing with pliers. Unlike screw-fastened connections, this coupling offers time-saving installation, although the pipes cannot be separated after assembly.

Thanks to its high-quality plastic construction, the coupling is especially lightweight yet stable enough for use in greenhouses and other structures requiring a permanent connection.
