Description

- **Application:** Connection of drive cable to 19 mm tube in shading systems
- **Material:** High-grade plastic for stable and durable fastening
- **Feature:** Increased distance between tube and fabric to prevent wear
- **Installation:** Clamping the wire rope with an Allen screw – clip attachment to the pipe
- **Packaging Unit:** 250 pcs

Lead edge cable clip EXT 19 is specially designed for shading systems and enables a **secure connection** between the drive cable and a 19 mm tube. The **EXT version** provides an increased distance between the tube and the fabric, protecting the screen from direct contact with the drive cable. This significantly **reduces wear** and extends the service life of the system.

An **M4x16 ISK screw** is required for installation (not included), ensuring the cable is tightly clamped for a reliable and durable fixation.
