Description

Our white ribbon fabric protects your crops from weeds and ensures increased incidence of light, as the ribbon fabric reflects incident light rays. Due to the light colour, the ribbon fabric does not heat up as quickly as the black version.

The ribbon fabric made of PP has a white base with black lines 25 cm apart.

The UV resistance is 500 kly.

Created at 27.06.2025.

^{*} Our offers are directed exclusively to companies. We do not conclude contracts with consumers. All prices excl. VAT plus shipping costs and possible delivery charges, if not stated otherwise.
