Description

- **Application:** Woven blackout fabric for professional shading solutions
- **Material:** Black woven synthetic mesh
- **Width:** 530 cm
- **Characteristic:** Ideal for suspended blackout systems in greenhouse environments

PH1-FP Blackout Woven Fabric - 530 cm is engineered for large-scale light-shielding applications. Its dark textile structure provides effective shading while remaining easy to handle and compatible with rail-based or draped systems.

Suitable for projects that require seamless wide-format coverage with reliable durability and functional aesthetics.

Note: Price is for fabric only. Cutting or sewing services available separately.
