Description

The pinion house unit TU 5-30 works as a drive for racks 30 in greenhouse ventilations.

A counter roller enables reliable and gentle guidance of the rack. Therefore you will profit from low abrasion of your ventilation system.

Thanks to a plastic-bearing the pinion house unit especially fits rather simple and light-weight ventilation systems.

For drives with 34 mm steel tubes.

Material: Steel housing with a plastic-ring bearing

Ridder Art.-Nr. 500017

Created at 27.06.2025.
