

Overview

Pillow block 1" with bearing

Product number: 24000100

Options

Bearing

6207 ZZ

SB 207

Description

The pillow block with a double-shell stamped metal bracket works as a support point for 34 mm drive shafts for ventilation- and shading-systems in greenhouses. The pillow block has mounting holes for M8 bolts.

Thanks to its double-shell construction the ball bearing within the bracket can be replaced, if needed.

The product can be delivered with a usual ball bearing SB 207 (24000101) or with a ball bearing with a longer inner ring UB 207 (24000101).

Material: Galvanized steel (housing & bearing)
