## **Description**

• Application: Hose fastening for diverse industrial and commercial uses

Material: Galvanized steel for high corrosion resistance

• Clamping Range: 50-70 mm

• Width: 9 mm

• Packaging Unit: 1000 pcs

• Feature: Robust and reliable fastening performance

**Clamp HC-W2** offers a dependable solution for securing hoses within the **50-70 mm diameter range**. Manufactured from corrosion-resistant **galvanized steel**, it ensures long-term durability in demanding environments.

With a band width of 9 mm, the clamp provides a firm grip that's well-suited for both industrial and professional setups. Its bulk packaging makes it ideal for large-scale operations requiring consistent and secure hose installation.
