Description

This high quality support plate from TGU works as a bearing for 34 mm drive shafts in ventilation systems in greenhouses. It has straight mounting holes.

This support plate is especially durable even under heavy weights thanks to a slide bearing, which is fitted with a special plastic ring. This bearing offers perfect slide effects and works as a substitute for grease.

Created at 19.05.2024.

* Our offers are directed exclusively to companies. We do not conclude contracts with consumers. All prices excl. VAT plus shipping costs and possible delivery charges, if not stated otherwise.
