Description

- **Application area:** Component of the TGU delay set for shading systems
- **Material:** Steel
- **Installation:** Connects the 19 mm fabric guide pipe with the 19 mm delay pipe

The **Cross clamp 19.20** is an important component of the TGU tube mount reduction for shading systems. It connects the **19 mm fabric guide pipe** with the **19 mm delay pipe** of the delayed panel and ensures stable fastening.
