This grooved cable drum ensures friction free, well-ordered winding and therefore a smooth movement of driving cable in shading systems .

Two-halves model of the drum makes it possible to fasten it onto drive shaft subsequently. The two halves are connected with four screws included into the set. To install the drum onto the drive shaft a special headless screw is needed.

The cable drum is made of high-impact resistant plastic, that is friendly to cables and therefore increases their durability.

Can be used with cords with a diameter up to 3 mm

For 34 mm drive shafts

Capacity of cable drum: up to 5,70 m

Material:

Cable drum: impact resistant plastic
