

Overview

Spring for slip joint (hard)

Product number: 21100114-1

Options

PU (Pcs)

Version

Description

- **Application area:** Supplementing sliding clamping parts in shading systems
- **Material:** High-quality spring steel design
- **Special feature:** Up to two springs can be used

The **Spring for slip joint (hard)** is used to **optimize the clamping technology** in shading systems. By default, the sliding clamping part is delivered with a soft spring. If this is not sufficient, the clamping part can be supplemented with up to two springs.
