

Overview

Grommet 4.8

Product number: 22000130-1

Options

PU (Pcs)

Description

- **Application area:** Protection of polyester wires routed through holes in metal profiles
- **Material:** Plastic
- **Installation:** Secured in sheet metal via integrated locking tab for firm hold
- **Maximum profile thickness:** 4 mm

The **Wire grommet 4.8** serves as a plastic insert to protect **polyester wires** routed through holes in **metal profiles**. Thanks to an integrated locking tab, the component can be securely fixed in the sheet metal, ensuring a firm hold. The grommet is suitable for profiles with a maximum thickness of 4 mm.

Made from high-quality plastic, the grommet remains durable and resistant to environmental influences.
