

## Overview

# Slide 19-25 mm

**Product number:** 22000106-1

### Options

#### PU (Pcs)

## Description

- **Application area:** Component of the TGU delay set for shading systems
- **Material:** High-quality plastic
- **Installation:** Connects the fabric guide pipe with the 19 mm delay pipe
- **Special feature:** Ensures stable and reliable fastening

The **Slide 19.25** is an essential component of the TGU tube mount reduction set for shading systems. It connects the fabric guide pipe with the 19 mm delay pipe of the driven panel and ensures stable and reliable fastening.

Thanks to its high-quality plastic construction, the clamp is especially durable and resistant to environmental influences. It contributes to the optimal function of the shading system and ensures smooth movement.
