## Description

- **Application:** Connection of drive cable to screen profile in shading systems
- **Material:** High-grade plastic for long-term use
- **Function:** Slip coupling with sliding clamp mechanism to protect drive cables
- **Feature:** Especially suitable for greenhouses with temperature-related material expansion
- **Packaging Unit:** 100 pcs

**Slip joint type 1 for screen profile - incl. 1 spring** gently connects the drive cable to the screen profile in greenhouse shading systems. The integrated slip coupling with sliding clamp technology ensures secure and flexible fastening while reducing strain on the drive cable.

This solution is particularly beneficial in greenhouses subject to material expansion due to temperature fluctuations, such as those with aluminum gutters.
